Describe your idea

More input usually improves relevance — especially keywords + exclusions.

What problem are you solving?

Warehouses face delays and order errors because manual picking and routing waste time and cause congestion in aisles.

What does your idea do?

Automates process

Analyzes data

- [ ] Reduces time
- [ ] Improves UX
- [ ] Hardware control

Primary domain

Robotics

Tip: Domain doesn't change semantic similarity much; keywords help more.

Key technologies

- [ ] AI/ML
- [ ] Cloud
- [ ] Mobile
- [ ] IoT
- [ ] Networking
- [ ] NLP
- [ ] Database

What's novel about your idea? (optional)

Uses multi-agent reinforcement learning for robot fleet coordination to reduce congestion and optimi

Power inputs Advanced

These steer the search hard. Comma or new-line separated.

Must-include keywords

warehouse robot, fleet coordination, autonomous navigation, multi-agent, reinforcement learning, routing, picking optimization

Exclude keywords

fraud, transaction, payment, tire, inkjet, printer, nozzle, medical imaging

Assignee (optional)

Amazon

Max results

Routing based on automation capabilities in inventory system

US10029851 · 2018 · AMAZON TECHNOLOGIES, INC.

Similarity **50%** Top match

B65G | Low confidence

Show abstract preview

Item information such as an identity or arrangement of a selected inventory item of an inventory system can be determined. A classification of the selected inventory item can be obtained based at least in part on the ite…

Hide why similar

- Also automates part of the workflow you described.
- Involves controlling hardware or equipment, like your use case.
- Falls under a similar domain (Robotics) in the CPC scheme.
- Mentions technologies that overlap with yours: AI/ML, IoT, Networking
- Classified in CPC area B65G, which is related to your idea's focus.
